REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The IDS filed 8/20/04 has been considered and does not read on nor render obvious the claimed subject matter.

The closest prior art reference is Schmeck et. al. (See Reference A). The difference between the Schmeck compound and the instantly claimed compound is the substitution on the pyridyl ring of the compound. In the instant compound, an N-oxide moiety is at the 2-position of the pyridyl ring, a phenylmethlamino group is substituted at the 3 position of the pyridyl ring. In the Schmeck compound, which is an intermediate compound to the final product, a cyclopentyl ring is at the 2 position of the pyridyl ring, a phenylmethlamino group is substituted at the 6 position of the ring, and an ethyl methyl esters are substituted at the three and five positions of the pyridyl ring. At column 21, lines 40-50, see example IV.

The prior art reference does not teach nor suggest to one of ordinary skill in the art how to modify the prior art compound to derive the instant compound. Therefore, the instant claims are allowable therefrom.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
